

Learning Intention

I am learning how one thing causes another thing to happen. I am learning to predict what might happen.

Success Criteria

I will examine some pictures and think,
“What problem might this cause?”

“What effect, or thing that happens, might come next?”

Cause and Effect

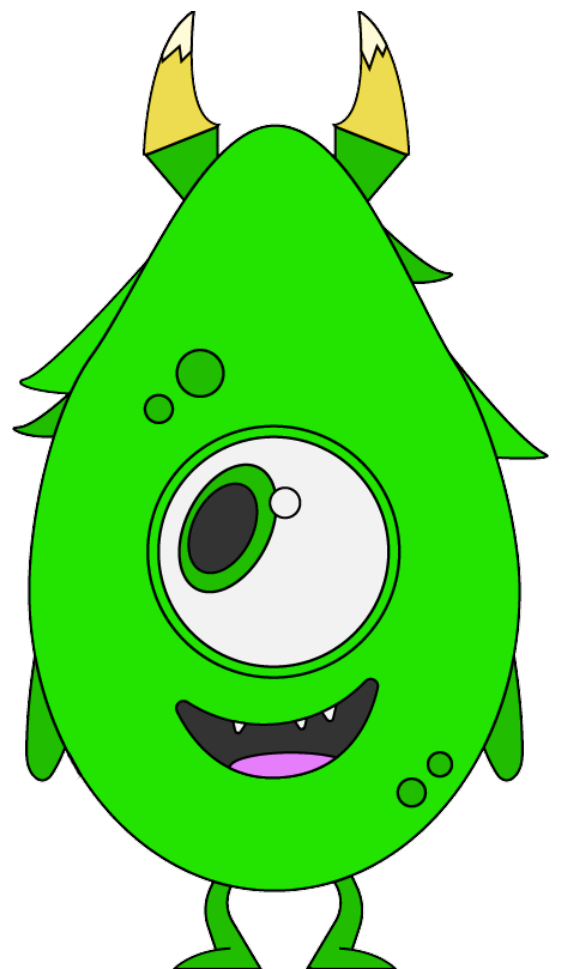

When one thing causes another thing to happen, it is called Cause and Effect.

The effect is the thing that happens. The cause is what made it happen.

Cause and effect helps us to know two things:

What happened?

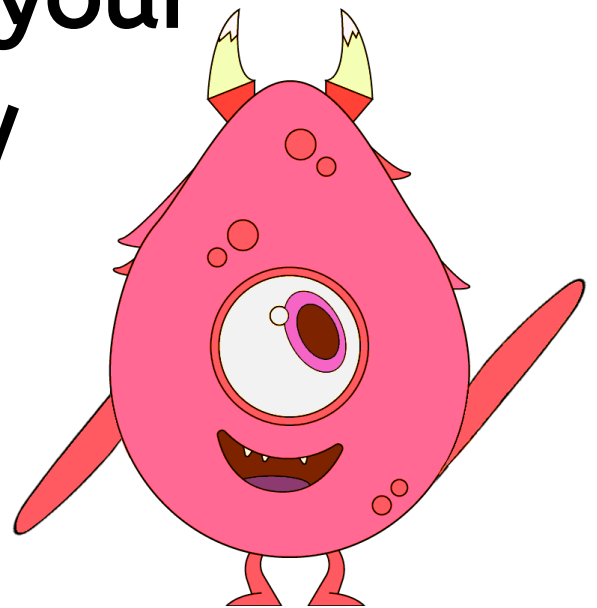

Why it happened?

Learning Checklist

Check these off as you go.

Look at two pictures from this lesson. Count on your fingers how many effects, or things you could predict might happen.
