

Learning Intention

I am learning to
formulate an
alternate solution or
think of a different
way a problem might
be solved.

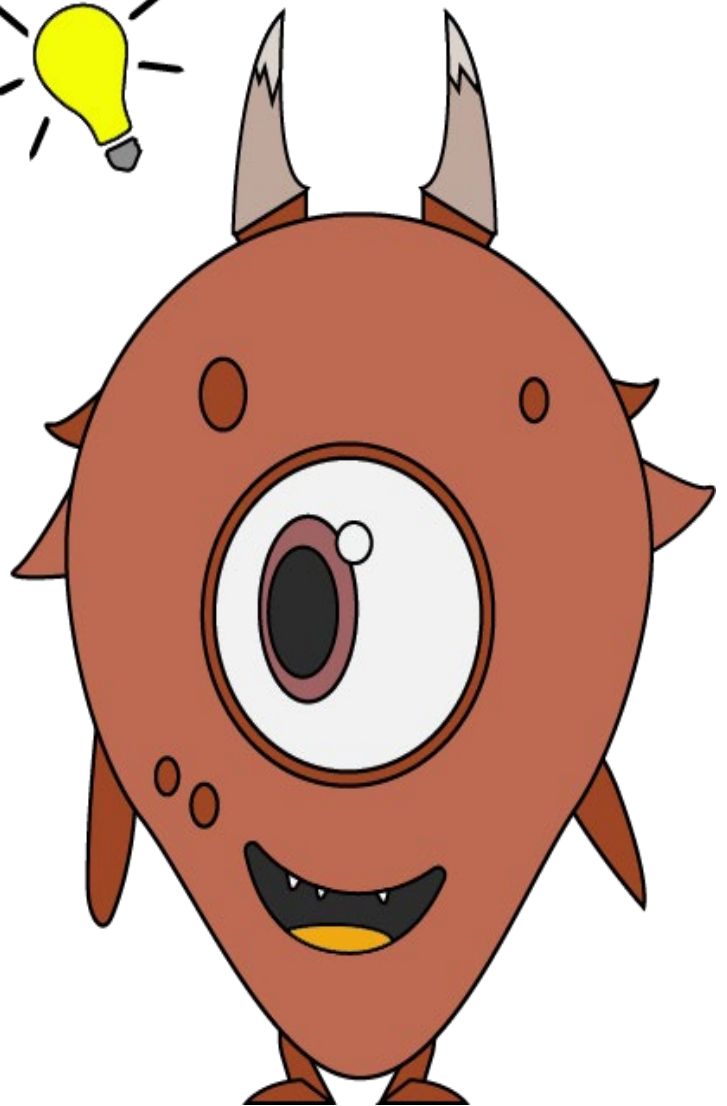

Success Criteria

I will think about the problem in the story and how it could be solved in another way. I

will think:

- Does my solution make sense?
- Would those characters do or say that?

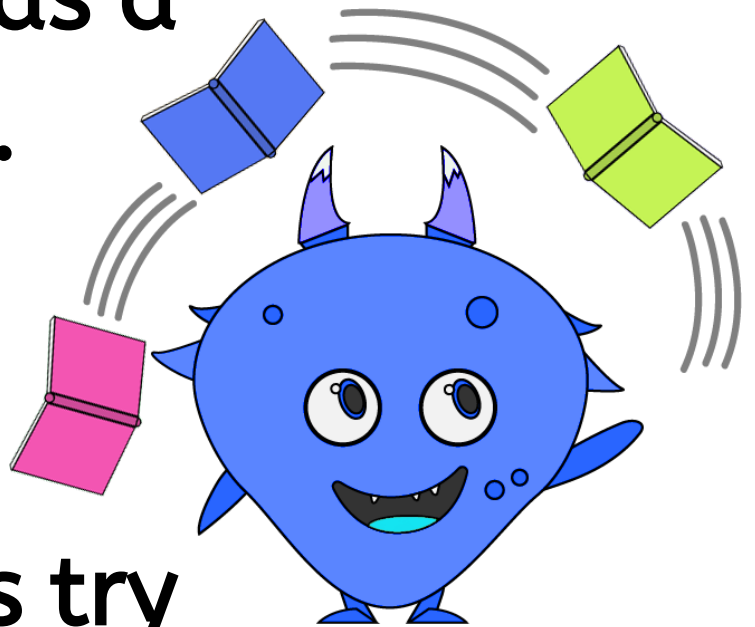

I will share my solution.

Problem and Solution

Most stories have a problem.

The problem is a bad thing, or something not good that happens to one of the important stars of the story.

The problem is usually solved so the story has a happy ending.

Skilful readers try to predict how the problem will be resolved, or solved.

Learning Checklist

Check these off as you go.

Did I:	✓
think of a different solution?	
think about whether my solution made sense?	
listen to other people's solutions?
